

What can the schritt:weise programme offer your child?

Early learning The schritt:weise (step-by-step) learning and play programme actively supports families as they educate and care for their children.

Promoting development As parents, you learn to encourage your child's development through games and play.

Good start You will support your child's healthy development and enable him or her to get off to a good start in preschool and school later on.

How does the schritt:weise program work?

Home visits A schritt:weise home visitor comes to see you and your child each week – later on, every second week.

Learning to play The home visitor is a trained lay assistant. She brings along a new play idea, a picture book or a game each time she visits.

Practicing play You play with your child using whatever the home visitor has shown you. In this way, your child gains many new experiences which are important for his or her development.

Group meetings The group meetings begin three months into the programme, and take place every two weeks. At them, you receive a lot of new information about early learning and meet other parents you can share your experiences with.

Programme length The schritt:weise learning and play programme lasts 18 months.

schritt:weise – good for young children and their parents!

- Children learn through active play
- Children train their senses
- Children expand their vocabulary
- Children discover new materials
- Children grow stronger
- Children and parents enjoy shared play

And taking part in the schritt:weise programme is so easy!

Participation The programme is offered in several languages.

Length The programme lasts 18 months. No home visits or group meetings are conducted during school holidays.

Costs Monthly participation costs for the family are Fr. 10 (play material fee)

primano is an early learning initiative of the City of Bern. primano runs the schritt:weise programme for the City of Bern, with the support of:

- Kanton Bern
